Partnership.
Progress.**

BMH Windowmaster 10

Workpiece dimensions

Length	200 – 3.500 mm
Width	35 - 200 mm
Height	17 - 140 mm

Standard specifications

Gantry	1
Robohead (S1/S6)	15/18 kW
Chucking collet	HSK 63 F
Linear tool changer	50 pos.
Center distance	152 mm
Maximum working length	
1 piece	3.500 mm
2 pieces	1.800 mm
Number of working tables	1
Number of clamping cylinders (double clamps)	14
BMH in- and outfeed buffer	✓
Infeed checking system	✓
Wireless barcode reader	✓
Frame dust extraction	✓
Servo controlled dust hoods for robohead	✓
Automatic central lubrication system	✓
Overpressure system electrical cabinet	✓
Sticker printer	○
Camera control system	○
Overnight dust extraction shut-off	○
Extra software macro's	○

✓ standard ○ optional

Linear tool changer with 50 positions.

Working table mounted on top of the frame with perfect clamping system.

Solid gantry with 5-axis robohead and servo controlled dust hoods for optimal dust extraction.

Robust manipulator arm with a large number of grippers.

Special shape of the working table for smart machining.

User-friendly BMH software with 3D simulation and collision detection.

Precision. Partnership. Progress.

Attention to craftsmanship,
detail and technical perfection.

We are committed to lasting relationships:
stronger together for the long term.

Continuously improving,
innovating and thinking proactively.

100% made in Holland!

We are proud to say that the entire process is carried out in-house. From preparation to production, from production to installation and from installation to after sales service. The lines of communication are short and direct, providing a significant advantage for you as a customer.

Experience the **BMH Windowmaster 10** in action for yourself.
